As for printing or legal advertising, we believe that this is left to the official from whose office the business originates, and that said official conducts his business in a manner that will benefit the County and the people he serves. And it is also, our opinion, as far as we can see, that all of the County's officials are doing just that—WHAT THEY THINK IS GOOD FOR ALL CONCERNED—and that outsiders should not be sticking their noses in and trying to tell the offciials what they should do and how they should do it. They have been elected to do a job and we think they should be let alone to work out their own problems.

These men, mostly farmers, called on their friends in their own communities to see how many were really willing to work for a better way of life.

They invited their friends to attend community meetings to discuss building their own electric power systems by borrowing money from the Rural Electrification Administration, a newly formed branch of the US Department of
